

ELEKTRA Temperature Controllers

The Electronic Temperature Controller ELEKTRA ETR is designed specifically for snow and ice protection electric heating systems. Produced in accordance with EN 60730-1 and EN 60730-2-9. It consists of controller and air sensor in the hermetic cover.

Electronic DIN-rail ETR

This package contains:

Type ETR-1447

- ETR controller,
- air temperature sensor in the hermetic cover (ETF-744/99),
- instruction manual.

> Technical data:

Power supply:	230 V ~
Max. load:	16A, 230 V ~
Installation:	DIN-rail
Temperature range:	
upper:	0°C ÷ +10°C
lower:	-10°C ÷ 0°C
Difference/Hysteresis:	0,4K
Temperature controller protection:	IP 20
Sensor protection:	IP 54
Work signalization:	LED
Dimensions (H x W x D):	86 x 52,5 x 58 mm
Certificates:	B, GOST-R
Product mark:	CE
